Water Softening

E6 Twin Tank

CONTINUOUS SUPPLY
OF SOFTENED WATER

E6 SERIES

Reduce the Effects of Hard Water

The E6 provides efficient simplicity in a twin-tank format to be used in large volume households. The twin alternating system uses already softened water down to the last drop instead of maintaining a reserve like single tank systems, which saves on water and energy and keeps hard water from ever entering your home.

Benefits of E6 Series Water Softening

-  A continuous supply of softened water
-  Extends the life of your water-based appliances
-  No more spotty dishes
-  Makes clothing, whiter, brighter and less scratchy
-  Protects pipes and plumbing fixtures
-  Cleaner fixtures, stain-free sinks, tubs and showers
-  Save up to 70% on soap and water usage from hard water removal
